

WUTTHIPAT THINLUANG

FULL-STACK WEB DEVELOPER (INTERN)

Phet.wutthipat@gmail.com | <https://github.com/Pheet> | 082-9823880 | Thailand

SUMMARY

Computer Science undergraduate seeking a Full-Stack Web Developer Intern role, with hands-on experience developing full-stack web applications for real users. Strong interest in backend development, system design, and secure, maintainable web applications.

TECHNICAL SKILLS

Programming Languages : Python, Java, C++, Go

Web Development & Backend: React, Flask, JavaScript, HTML, CSS

Tools & Platforms : Git, GitHub, Linux, Command Line

Concepts & Interests : Authentication, Application Logic Security

Additional Exposure : Agile/Scrum, Docker, Machine Learning (fundamentals)

EXPERIENCE

Web Application Development for Research and Student Project Search Aug 2025 - Nov 2025

- Developed a full-stack web application using Flask for backend APIs and a modern JavaScript-based frontend, contributing across both frontend and backend components.
- Containerized the application with Docker and Docker Compose to standardize development environments and reduce setup friction for team members.
- Served as Scrum Master and Requirements Manager, coordinating sprint planning, clarifying evolving requirements with users, and aligning technical tasks within the team.

PROJECTS

Automated Payment Verification Bot (Discord bot) Oct 2025

- Independently designed, developed, and deployed a Python-based bot on Render to automate bank slip verification by integrating with the SlipOK API, ensuring real-time transaction validity and fraud prevention.
- Designed a Flask-based keep-alive mechanism to maintain service availability and automatically update user subscription status upon payment confirmation.

Income and Expense Tracking Web Application Jan 2025 - Mar 2025

- Developed a full-stack web application for tracking personal finances, architecting both the backend logic and frontend interface to facilitate seamless transaction recording.
- Implemented interactive financial visualizations using Chart.js to help users analyze income-expense trends and spending behavior.
- Implemented a slip verification feature that allows users to upload and attach transaction images, ensuring accurate record-keeping and data integrity.

EDUCATION

Chiang Mai University

June 2023 - Present

Faculty of Science, Department of Computer Science

- Bachelor of Science in Computer Science
- Minor in Economics, with a foundation in economics and business thinking

ADDITIONAL INFORMATION

- **Languages:** Thai (Native), English (Intermediate)
- **Strengths:** Problem-solving, fast learner, logical thinking
- **Interests:** Cybersecurity, system design, secure software development
